

Körber Stellium's Digital Manufacturing Accelerators for Process Industry

A pre-configured, modular solution that speeds up implementation by reducing customization, ensuring best practices, & enabling quick integration with SAP systems.

Achieving Operational Excellence

Körber Stellium's Digital Manufacturing (DM) framework unites SAP S/4HANA, SAP DM, and real-time plant-floor intelligence to deliver agility, accuracy, and speed. Each implementation leverages 11 industry-ready accelerators, modular, configurable templates with proven process standards, quality governance, and built-in analytics.

Faster deployments with minimal customization

Higher process reliability through standardization

Immediate ROI with accelerated digital readiness

Achieving Operational Excellence

Reduce complexity and standardize execution

Reusable design patterns to cut setup time

Achieve digital maturity faster

Scalable frameworks for continuous improvement

Pre-configured best practices for process industries

Easy integration with SAP S/4HANA and SAP DM

Körber Stellium's digital manufacturing accelerators for process industry

Formulation

Digital BOM mixing, QR-based material selection, FEFO validation, supervisor-approved corrections.

Dashboard

Real-time KPI dashboards for monitoring operations, efficiency, and data-driven decisions.

Portioning

Controlled portioning via scales, color-coded display, FEFO auto consumption, phase confirmation.

Material Consumption

FEFO-based batch validation, QR driven consumption, and enhanced traceability.

Target Dynamic Optimization

Auto-adjusted tolerance improves operator precision and enforces quality compliance.

Confirmation Plugin

Combines activity and quantity confirmation with role-based access.

Mass Operator Assignment

Unified interface for assigning scales, operators, materials, and batches with role-based access.

Goods Receipt Plugin

Validates quantity against order variance; HU scanning for accurate posting.

Milestone Confirmation

Automated preceding phase confirmation with real-time S/4HANA updates & timestamps.

Post-Production Reporting

Role-based editable POD fields with validations for controlled postings.

Packing

End-to-end packing, traceability with IDs, & auto-generated detailed labels.

Ready to Transform Your Plant Operations?

Let Körber Stellium be your trusted automation partner.
