OEMs

## Körber Stellium's In-house Innovations

### Chain Brain

AI-powered supply chain assistant using GPT-4 for insights and decision support.

### StockSnap

AI-driven tool for real-time inventory validation and WMS cutovers.

### 4Kast.ai

Forecasting engine to cut costs and increase accuracy in demand planning.

## Value Delivered

### Customized for Industry Needs

Solutions tailored for industries like paint & chemical plants, addressing industry-specific dispatch & safety requirements.

### End-to-End System Integration

From MES to AGVs and WCS, we unify your ecosystem for uninterrupted, real-time data flow.

### Rapid Adoption

Real-time training and support reduce onboarding time and manual error rates.

### Seamless Integration

Smooth data flow across all platforms.

### Scalable Rollouts

Stable, uniform multiplant deployment.

### Auto Error Handling

Minimal-code, no touch SAP error fixes.

## Why Choose Körber Stellium

### Pioneering Innovation

Built to grow with your business and tech advances.

### Decade of Proven Experience

Successful programs & implementations.

### Customer-Centric Approach

Tailored solutions addressing specific operational needs.

## Ready to Transform Your Plant Operations?

Let Körber Stellium be your trusted automation partner.
