EWM Optimization and Global Template Build for TE Connectivity

Overview and objective

TE Connectivity, headquartered in Schaffhausen, Switzerland is engaged in the design and manufacture of connectivity and sensor solutions for several industries, such as automotive, industrial equipment, data communication systems, aerospace, defense, medical, oil and gas, consumer electronics and energy. TE Connectivity has a global workforce of 89,000 employees, including more than 8,000 engineers. The company serves customers in approximately 140 countries

10 DC
Optimization

20+ DCs

100+
associates

Integrated with
EWM, TM,
and ASR.

Value delivered

Global Template
Design

Automated Warehousing Process
to Facilitate Replenishment to
Manufacturing Facilities

Increase of number of
dispatch lines since Hypercare
completion

Improved throughput with
simplified picking and optimized
inventory management.

Solution improvements and add ons

Prioritized Pallet Picking to increase Throughput

Automate Workload Assignment to Pickers based on Delivery Priority picking to reduce WIP

Digitized end-to-end process of warehouse operations

Solution

Supports multiple processes such as Customer Orders, Milk Run Production Supply and cross company sales within the same DC

EWM and TM Embedded in S/4 System, connected with current ECC System, SAP PI/PO supported by Carrier integration via XPS

Process-centric Mobility app with rich UI features for carrying out Warehousing operations

Automated Picking workload assignment, simplifying picking process by optimizing pallet allocation
